James Creek Simmental  
**ANNUAL PRIVATE**  
**TREATY SALE** **XIV**  
*Volume*

**02.07.17**

**1 P.M. - AT THE FARM**

**Sale Day Phones:**

Call or text 701-652-5530

**Terms:**

- Bulls will be priced by James Creek Simmental, and prices will be available one week before the sale.
- No animal will be promised or sold before February 7, 2017, 1 p.m.
- Let James Creek Simmental know your choice between 12 noon and 1 p.m. and the bull or heifer is yours.
- After 1 p.m., in the case of two or more wanting the same animal, James Creek Simmental will let the interested parties bid amongst themselves to determine the winning buyer and price.
- James Creek Simmental will keep your purchase for free until April 15, 2017 and we will semen test all bulls.
- You may pay half on sale day and the balance due upon delivery of your purchase
- James Creek Simmental recommends you purchase insurance for your purchase.
- Any questions please don't hesitate to call.

**Delivery:**

Free delivery within 250 miles of JCS and we'll help with arranging trucking

**Directions:**

*From the West:* Junction US 52 & Hwy 200, go East 4 miles to 47th Ave. Turn South and go 2.5 miles. Farm is on the west.

*From the East:* Carrington go West 20 miles on US 52/200 to 47th Ave. Turn South and go 2.5 miles. Farm is on the west.

Greetings and Welcome to our 14<sup>th</sup> James Creek Simmental Private Treaty Bull Sale! In our operation we had a very good year, crops yielded well and the pastures supported our cattle. The fall was great for getting calves weaned and cattle moved to fall pastures. Grain harvest went fast and was successful. In December we went from green grass and maybe mowing our lawn to over 24 inches of snow and 2 blizzards. There are snow banks and drifts over 6 feet deep in cattle lots and pens. We have been trying to get photos done all December. Now, we are trying to find room to pile the snow and time between snowstorms to get photos done. We hope you understand if the photos look hurried.

It is time to present our sale cattle for your appraisal. Please let us know your questions about the cattle listed and our sale process. We are very impressed with several of the bulls that have developed into great herd bull prospects. You are welcome to stop by and see the bulls before the sale. As a friend told me, trying to breed the next genetic master piece is why we do this.

The bulls and heifers were given Bovi-Shield 5 and 7-way with haemophilus in May before going to pasture. The same vaccinations were given in September before weaning. Bovi-Shield 5 was boosted after weaning, in October. We de-wormed the bulls with Safe-Guard pellets in November.

The bulls and heifers were weaned on October 4, 2016. They are on a TMR that consists of whole corn, dry distillers, alfalfa, grass hay, beet pulp and a mineral supplement. This ration is balanced to a 14% protein level and has been worked up to an energy level of .52 net energy gain. These rations have worked really well for us the past few years and the bulls have gone on feed very easy.

We have included some information that we are tracking for our own use. Using the cow's weight at weaning time we can determine the calf's performance against the cow's weight for birth weight and weaning weight. These are expressed as a percentage of the cow's weight and are located on the individual bulls page. The weights used are the actual weights taken on September 23, at preg checking and vaccination time. Our herd average the last several years is 6-7% for birth weight and 43% for weaning weight. We have included days of gestation (DOG) on the bulls that were AI'ed or had breeding dates. We feel that 288 days gestation hits our herd fairly accurate over time for 'normal' due dates.

On January 2, 2017 weights, frame score and scrotal measurements were taken. The frame score and scrotal measurements are listed as an adjusted number to one-year of age.

Check our website for performance updates of the bulls. We will have another set of weights around January 29, 2017. All of the bulls are dilution tested and the results will be available later in January.

Come early and have lunch with us starting at noon! Hanna and Hailey will have their special Simmental cow cookies. We hope to visit with you soon!

— Honestly this girl should be staying with us! Her breeding ties the Franchessa and Lolita cow families together. These 'Radium' calves keep surfacing and the first ones to calve look great. From a first calver that we really like. Full Fleckvieh.

## FEEDLOT & CARCASS PERFORMANCE

We have been finishing our calves for 19 years. Listed here is the last five years of data and average. All calves are sired by Fleckvieh bulls.

	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>5 Yr. Avg.</u>
Average Daily Gain	3.72	3.11	3.34	3.37	3.65	3.44
Live Weight	1412 lbs.	1361 lbs.	1268 lbs.	1320 lbs.	1357 lbs.	1343 lbs.
Choice	74%	55%	40%	62%	93%	65%
Yield Grade 1 & 2	97%	93%	98%	97%	95%	96%
Average Rib Eye (sq. in.)	15.84	15.67	14.95	15.37	15.76	15.51
Dressing Yield %	63%	63%	62.4%	63%	63%	63%
Dry Matter Conversion	5.67	5.61	5.21	6.2	5.48	5.63

I encourage you to finish a few calves to get your feet wet. Consider the genetic improvement that you are striving for in your cattle operation. Today's Fleckvieh bulls give you the genetics to produce highly efficient and productive cattle to work with your environment.

Our calves are fed at Kansas Feedyard, Scott City, KS. The data above is from that environment. Our environment in ND is vastly different and we see these same efficiencies with our cow condition and production traits.

Would you like to capture more dollars from your genetics or give it away to someone else? Give this a try. If you have questions about how we do this give me a call. I'd be glad to visit a b o u t this with you.

THANK YOU  
FOR YOUR INTEREST  
IN OUR *Program!*
